Technical Skills

Object-oriented programming:	**Python, Java**
Front-end tech/frameworks:	**HTML5, CSS3, JavaScript, AngularJS**
Platforms:	**Web, Unix**

Summary

I'm a software developer from Boston, USA. I'm currently pursuing master's program in Information Systems at Northeastern University and I'm looking for new opportunities. I'm most at home being a java developer and I really enjoy coding in java. However I also have experience in building web applications. I have prior experience in server-side development and working with databases. Consistency and clear communication have always been very important to me and I'm a quick learner who is always eager to pick up new technologies.

Education

Northeastern University	**Boston**
